Revigo TreeMap

Revigo TreeMap							
plasminogen activation	zymogen activation	blood coagulation		regulation of body fluid levels		response to p response to pro	response to topologically ostaglandin incorrect protein
		blood coag		ulation			
				acute inflammatory	acute-phase response	regulation of regulation of plasmin plasmin plasmin plasmin plasmin plasmin activation	regulation of nogen activation protein maturation
plasminogen activation		coagulation		response		plasminogen activation protein materialion	
protein activation cascade	protein maturation						
hyaluronan metabolic process	glycolytic process	complement activation	regulation of complement a response to wounding	negative regulation activation esponse to external stimulus	immunoglobulin mediated immune response	regulation of coagulation	chaperone–mediated protein complex assembly
